

Powering A NEW PERSPECTIVE ON INFORMATIONSM

Do your corporate performance management, business intelligence and ERP software applications accelerate your organizational goals?

Are you capitalizing on these tools to achieve competitive excellence?

In today's fiercely competitive economy, corporate performance management, business intelligence and ERP solutions are catalysts for improving organizations. Leaders of emerging and enterprise businesses rely on these tools to build their companies' futures—to act more quickly and capitalize on more opportunities. Because technology can be overwhelming, you need direction. nexDimension defines your requirements, presents alternatives and implements the right technologies to achieve your objectives and guide your organization to that future.

At nexDimension, we make you more “intelligent” by deploying corporate performance management, business intelligence and ERP solutions in five distinct but interconnected areas. While each of these solutions may be implemented individually in either parallel or sequential phases, the underlying technologies are seamlessly connected. When used together, the overall result is a world-class information system.

CORPORATE PERFORMANCE MANAGEMENT (CPM)

A collaborative process for budgeting and planning for your financial future has a positive impact on your company's bottom line and shows an on-going return on investment through time and money savings.

BUSINESS INTELLIGENCE (BI)

Monitoring and measuring key performance indicators (KPIs) ensures a clear picture of business activities in relation to the original business vision, resulting in better alignment of actions with corporate strategy.

GENERAL BUSINESS & AD-HOC REPORTING

Transforming valuable enterprise data into shared information for insightful, timely decisions is the best way for C-level executives, business managers and knowledge workers to obtain relevant information necessary for day-to-day operations.

BUSINESS PROCESS MANAGEMENT & BUSINESS ALERTS

By proactively providing stakeholders with the right information at the right time, organizations can get smart, be agile, stay consistent and maintain control.

ENTERPRISE RESOURCE PLANNING (ERP)

With the right solutions to help process transactions, people in key positions contribute to their company's success by being more productive, making better business decisions and pursuing goals with confidence.

OUR APPROACH

At nexDimension we know that every business is unique. We examine all aspects of your business—from identifying corporate challenges and analyzing business processes to assessing how you make use of current technology. Next, we consider alternatives, provide strategic direction, and implement technology with both present and future interests in mind. Our goal is to establish solutions tailored to your specific business model.

nexDimension's approach is Microsoft-centric at the technology level. These technologies could replace an existing system or be deployed in conjunction with existing systems. No matter what you decide, you don't need to do it all at once. We focus on applications that will use your existing and future data to maximize your organization's competitive advantage. At nexDimension, we guide you into the future while preserving your past.

SERVICES & SUPPORT

nexDimension has a single vision: We provide solutions that make our clients more efficient, agile, competitive and profitable. We do this by supporting and promoting the optimal use of corporate performance management, business intelligence and ERP solutions.

Our customer service approach is simple: We do whatever it takes to ensure the success of your projects. That is our pledge to you.

ABOUT NEXDIMENSION TECHNOLOGY SOLUTIONS

nexDimension Technology Solutions provides the most focused, comprehensive and cost-effective corporate performance management, business intelligence and ERP solutions available to emerging and enterprise businesses.

When you partner with nexDimension you are partnering with a trusted business advisor. We pride ourselves on knowing our clients and our extensive knowledge of the software we recommend and implement. Our staff includes financial, business and technology experts, including CPAs, former CFOs and controllers, computer specialists, software developers, and implementation consultants. Every member of the nexDimension team is dedicated to providing the depth and quality of service to meet your needs.

At nexDimension, we go beyond providing and implementing solutions. We understand that the investments you make today in business applications and technology will have an impact on your business tomorrow. We guide you to a future powered by a new perspective – one that makes you more efficient, agile, competitive and profitable.
